

VISION

Our vision is to be a dynamic movement, which serves as an effective resource to empower people to attain optimal mental well-being and quality of life, in a just society.

MISSION

We actively work with the community to achieve the highest possible level of mental health for all by:

- Enabling people to participate in identifying community mental health needs and responding appropriately;
- Developing equal, caring services for people having difficulty coping with everyday life, and those with intellectual and / or psychiatric disability;
- Creating public awareness of mental health issues; and
- Striving for the recognition and protection of the rights of individuals with intellectual and/or psychiatric disabilities.

We aspire to contribute to a just and fair society through our four main programmes:

- Capacity Building
- Social Integration
- Human Rights
- Mental Health Awareness
